WORLD LINK TECHNICAL SOLUTIONS LLC.

World Link Technical Solutions LLC is one of the technology driven futuristic companies in Oman. Our company was established and registered in the year 2009 with a vision of connecting the world with Oman.

We, being a part of a group of companies in various verticals, realized the missing link in business which is IT itself. We partnered and act as local agent for a few IT MNCs facilitating effective execution of many turn key projects for many major companies here in Oman.

We undertake annual contracts of various IT product and service maintenance for Omantel, Ooredoo etc. and we have more than 35 Software Engineers working with us through Agency and Representations.

OUR PRODUCTS:

- Beyond the Numbers Accounting
- Beyond the Billing POS
- Beyond the Facts ERP

OUR SERVICES:

- Agency and Representations
- IT Maintenance Services
- Smart Shelf Solution: An E-Documentation Initiative
- IT Hardware and Software Supply
- ArchiTech: Custom Developed IT Solutions
- Print & Branding Solutions

OUR PRODUCTS

Beyond the Numbers Accounting:

Book keeping is a day to day activity of any business and it is of due importance during the end of the year. Most of the accountants and even managements find it as mere numbers but we find a lot of potential Beyond the Numbers. Yes, they speak a lot of things much beyond the magnitude of the final figure.

Accounting is always found running a preset show with minimum flexibility to fit into the core concept of the business. Zealous Entrepreneurs look into accounts team as a standalone department which really can't be integrated in a seamless way without lot of man power. This very thought is our motivation to come up with an Accounting ERP which really adds value to one's business.

We believe each business is unique and their accounting practice also must be different. It's well written that the primary objective of any business is to make money but we also know that not everyone sells apple. Thus we offer the right solution for your requirement.

We just don't sell what we have, but cater for your needs. We understand your business model and customize ourselves to fit into your business. We help design the accounts and even act as a catalyst for BRP (Business Process Re-Engineering), if required to adopt the best practices in the respective industry.

All our products are designed and developed by our experts, which means that we know it high and low. So we are confident to sit across the table with you to discuss what more you need to make your life easy.

We don't get settled with the second best. Thus we always see far beyond.

Beyond the Billing POS

Point of Sales (POS) is nothing new now as there is no retail billing without a POS. Our team thought beyond it as usual to go a step ahead to the conventional POS.

It's not just billing for you, but much beyond in all terms.

Beyond the Facts ERP

We don't entertain standalone packages but always keep a room in all or applications for expansion. Even our Beyond the Numbers Accounting is not just an accounting package but the backbone of our ERP. Our ERP system is accounts focused and intelligent. It can be customized to reflect your business and join hands with you to take your dreams to the next level.

We dream Beyond the Facts and make you realize your dreams. Our team is well trained to understand your business and customize the system for you and even develop the unimaginable modules for you.

Why don't we have a cup of coffee and discuss further on what we can do for you?

OUR SERVICES

Agency and Representations:

We are well known as the representatives of various IT giants around the globe. Tech Mahindra from India is one among them. We act on their behalf and facilitate smooth execution of all projects and services in Oman. Our team of qualified employees bridges the time and distance gap between the client and the vendor to Feel Local, Yet Global.

We are also partnering more companies on a yearly basis as per the vision of our management to be a connecting link between Oman and the World.

IT Maintenance Services

Information Technology is a fast growing child. It is said that the performance doubles every 18 months which reminds us that our IT assets can get obsolete in no time. Our experts are well trained and well updated on the technology outburst. This is our edge in the IT asset maintenance industry.

We are experts in evaluating and maintaining the IT assets of your company as perfect as it can be. We drill down to the deepest glitch to fix it and ensure a higher ground of security and our IT Doctors don't mind to go that extra mile with a smile.

We also train your IT asset users to avoid abuse of assets as we care for them. We believe most of the IT related issues can be prevented if the users are aware of it. As always, we emphasize that it's cheaper to be Pro-Active than Reactive.

Smart Shelf Solution: An E-Documentation Initiative

Documentation is part of our daily work life. We as techno thinkers, make all things 'E'lectronically Simplified. Yes, E-Documentation is our latest initiative in an innovative approach. We have our documentation experts to convert all our documents to e-documents.

Still it is not just transformation to e-doc that matters, but the usability of it. That is where our Nex-Gen File Storage Application, Smart Shelf Solution makes your life easier. No more manual analysis and calculations. Let us do it for you in a click as a subscription model.

The RFID enabled physical file tracking system is yet another additional premium technology we have to ensure tracking of files and documents precisely with ease

IT Hardware and Software Supply

We are authorized partner for all major IT and Network Products and Services. We build relationship with all global players to bring them in the local market within an affordable range.

We grow our partner network on a day to day basis and try to literally mean World Link. We expert partner team reviews the products and services we offer and suggest the best solution for your requirement than pushing any solution we offer. We keep our eye on quality, reliability, durability, affordability and customer delight.

We supply simple Antivirus solutions to complex Accounting and ERP Solutions.

ArchiTech: Custom Developed IT Solutions

Standard solutions are the best for most of the scenarios. Still in our practical experience, we found that not all questions can be answered well with standard procedures. Each business is unique and a unique business can have unique issues too, so each one needs a unique solution for their specific needs. Thus we have our in house team to design and develop customized homemade solutions to match your business process.

We have found real satisfaction on a lot of faces and its real freedom to use some solution where we have full control. We are experts in it as we have expert team to understand your business process and adapt it to an IT friendly environment with very minimum business process reengineering. Right from a company website, we do in and out of all web and windows applications along with mobile apps for Android and iOS platforms.

Print & Branding Solutions

Creativity is in our blood and we can be nothing less than creative in all what we do. This is where we realized our potential in print and branding solutions. Our designing division is the best in branding solutions right from Logo, Labels, Brochures, Business Cards, Envelopes, Gifts and Complements, Uniforms and Office Interior designing.

This will help you stand out where ever you are and be well remembered by your clients. So think how you position yourself in the market now and how well you can be. We are remembered where the need for excellence beings.
